

EVOX 12

ACTIVE TWO-WAY ARRAY

EVOX 12 is the most powerful line-source in its class and offers a particularly profound and dynamic reproduction at high levels due to the built-in 1400W power amplifier. The top section has eight high performance neodymium 4" full-range transducers with a phase plug. As a result, the EVOX 12 has a significantly increased low-mid playback at a constant level with a wide dispersion for the highs. The 15" subwoofer delivers powerful bass sound to reinforce a big party or the kick drum of a live band. Despite high performance, the enclosure is very compact, and thanks to integrated wheels and extendable handle very easy to transport.

REVOLUTIONARY 4.0" FULLRANGE DRIVERS

The 8 ultra-compact full-range 4.0" neodymium driver are capable of handling extremely high spl and power.

- 1400 Watt
- 130 dB max SPL
- 40 Hz 20 kHz frequency response
- 15" Woofer
- 8 x 4" neodymium full-range woofer
- 90° x 30° slightly tilted pattern control
- Innovative DSP processing
- Pole mountable, easy set-up and transportation

GREAT FOR TRANSPORTATION

EVOX 12 includes two recessed rear wheels and a convenient extendable handle: transportation never has been easier. The top column inserts on the pole mount, which easily screw on the sub. Carrying and mounting your audio system has never been so quick!

■ Presentations

INNOVATIVE DSP PROCESSING

A digital amplifier delivering 1400 Watt powers the EVOX 12: 400 Watt for the top line source and 1000W for the low frequency cabinet. Thanks to the frequency dependent drivers' excursion and control of distortion, our processing is capable to guarantee an incredible and unmatched output from this small system. Dedicated vocal processing has been specifically studied for speech reproduction during presentations or conferences.

PERFECT ARRAY COVERAGE

EVOX 12 array design features constant horizontal directivity coverage of 90°, offering a perfect listening experience to the audience. The vertical array design is progressively shaped to guarantee a correct listening from the first row and to avoid a high frequency beaming typical of straight array.

HIGH POWER 15" WOOFER

The high excursion 15" woofer is able to extend to the lowest frequencies and offer a quick and precise response up to the crossover point.

LIVE SOUND

Extensive testing with instruments and voices during the design process as well as power and reliability testing make the EVOX system the perfect workmates for solo musicians or bands.

DJS

Extremely deep response, precise low frequency control and incredible audio quality, easy to transport and quick to set up. EVOX 12 is without any doubt the best choice for DJs.

CONFERENCES

Extraordinary clarity and dynamic of vocal reproduction, both at low and very high levels. EVOX 12 is a great tool for conferences and speech.
